Water Distribution for November

13 communities

210,000 liters

70,000 people

Recent inclement weather has exacerbated the humanitarian crisis in Gaza. Operation Realife dispatched additional trucks this month to help individuals and families impacted by the heavy rainfall and flooding. Over the last two years sewage, drainage, and pipeline infrastructure has been severely damaged, causing major flooding issues. Many families are being forced out of their tents and some ground floor structures. This makes it more challenging to access clean water and increases reliance on emergency water distribution.

Some hygiene and sanitation kits have reached a few thousand people through INGO efforts, but the water crisis has seen very little improvement beyond this short-term relief. Water is still being rationed, people are walking far distances for water access, and the demand at our water events is as high as ever.

Operation Realife is a 501(c)(3) nonprofit organization.
